Experience

Deutsche Bank

Pune

Senior Analyst (SDE-1)

July 2021 – September 2023

Associate Engineer (SDE-2)

October 2023 – Present

- Backend Engineer proficient in **designing, developing, testing, and deploying** backend solutions.
- Developing enterprise-level **Spring Boot RESTful** microservices for bank's Hedge Accounting application, reducing the bank's P&L volatility by **\$800 million** over the last two years.
- Implemented features to synchronize data processing from various upstreams, cutting turnaround time by 75% and improving hedge accounting accuracy.
- Implemented Authentication and Authorization based on OpenID Connect using the **OAuth 2.0** flow for application security and access control.
- Automated **CI/CD** process using **Jenkins, Helm Charts, and Docker**, boosting deployment time, and team productivity, while reducing production lead time and manual maintenance efforts.
- Drove the strategic remediation of **Open-Source Software vulnerabilities**, successfully mitigating over 90% of vulnerabilities, enhancing the application's security and reliability.
- Led the automation of the database release process using **Spring Liquibase** and **Kubernetes Jobs**, improving management and tracking of database changes.
- Participated actively in code reviews, providing valuable feedback to enhance code quality and ensure project reliability.

Key Projects

Minutes in Seconds

August 2023 – October 2023

Why: It is hard to keep track of all the meetings in this new normal, remembering what happened in a meeting last week or last month is tough.

- Developed a **Python**-based bot with **FastAPI**, seamlessly integrated into Microsoft Teams meeting invites, delivering meeting summaries and action points automatically via emails.
- Utilized Microsoft's **GraphAPI** to get meeting details and send emails, **OpenAI** to generate summaries from transcripts.

Athena

July 2022 – July 2023

Why: The resource allocation process of DB's graduate program was manual and required a lot of man-hours.

- Developed a platform utilizing **Spring Boot**, and **Oracle** to streamline resource allocation, reducing manual efforts by 90%.
- Implemented a **Python algorithm** for efficient resource allocation, cutting allocation time from 2 weeks to 5 minutes and achieving a 72% increase in user satisfaction.

Certifications

- Google Certified Associate Cloud Engineer

January 2023 – January 2026

Skills

Programming Languages – Java | Python | SQL

Cloud and Database – GCP | Helm | Kubernetes | OpenShift | Oracle SQL | MySQL

Frameworks – Spring Boot | Spring Cloud | Flask | FastAPI

Tools – Git | Jira | Jenkins | Maven | Liquibase | Splunk | Junit | Mockito

Education

Bachelor of Engineering, Information Technology

August 2017 – July 2021

Thadomal Shahani Engineering College, Mumbai University

CGPA – 9.14

Interesting Highlights

- Represented Athena in Deutsche Bank's **Dragons Den**, felt like Shark Tank, but cooler. September 2022
 - Teamed up with some new faces, and within a week we were one of the winning teams in July 2020
- JP Morgan Code for Good.
